Pre-course reading

**5 days of input from
expert instructors**

Full course notes

CPD certificate

**Recognised
Qualification (UK)**

\$2900 AUD

To book, please call or
email Russ Timpson

Management of Fire Safety in Tall Buildings is essential if the risk of fire is to be kept within acceptable limits. More and more Tall Buildings are being built, and existing Tall Buildings modified and changed. Tragic fires in the recent past have shown how Tall Buildings can pose real challenges to firefighters and those charged with evacuating occupants. Competent fire safety management is the key to fire prevention.

Developed to compliment membership of the **Tall Buildings Fire Safety Network**, the Tall Building Fire Safety Management Training Course is packed with useful **tools and techniques** for those tasked with management.

Instructors on the course are **experts** in their field and come with a wealth of knowledge and experience. Delivered over 5 days in existing Tall Buildings, the course will cover a wide syllabus of relevant topics and **case studies**.

Day 4 -

Theme: **Containment**, passive barriers, steel protection, sprinklers, construction work

Day 5 -

Theme: **Firefighting**, fire statistics, fire growth, firefighting techniques, wind driven fires

This course is ideal for anyone who has a responsibility for managing fire safety in a tall building, including; high rise residential, hotels, business and office blocks and mixed use. Delegates are assumed to have a level of fire safety knowledge equivalent to that of a fire warden—prior to the course.

Course Director—Russ Timpson

is a Chartered Fire Engineer, with many years experience of fire safety management. He is the secretary of the Tall Buildings Fire Safety Network, which has been established since 2009. RT's career included Group Fire Strategy for BAA, looking after 7 UK, and 8 International Airports. RT is an active member of the Institute of Fire Engineers and delivers regularly CPD events for practicing fire engineers and fire risk assessors. Russ was recently awarded International Fire Professional of the Year 2015.

International Fire Professional of the Year 2015

What Previous Delegates Have said:

"I attended the training course for fire safety management in tall buildings; although I have been doing fire safety for over 20 years this course really opened my eyes to the plethora of problems that have to be addressed when managing multi occupants in tall buildings and should not be underestimated.

The instructors' were first class they brought their wealth of knowledge and practical experience to all the problems that can occur in these types of buildings and it was illuminating.

I would thoroughly recommend this course to any person who has to manage fire safety in tall buildings.
