

What if...

You're Safe with C-TEC

# What if...

---

You could link Equality-Act friendly domestic fire alarms to a landlord monitoring system to warn of a real fire, but NOT evacuate the building every time somebody burns the toast?

You're Safe with C-TEC

## What if...

---

You could incorporate attractive and compact all-in-one detection & alarm devices that detect real fires quickly, reduce false alarms effectively and indicate true alarms decisively?

You're Safe with C-TEC

# What if...

---

You could operate the door release mechanisms on the building's fire doors in line with the requirements of BS 7273-4 Category A?

You're Safe with C-TEC

# What if...

---

You could report real fires to an alarm receiving centre so the Fire and Rescue Services could arrive knowing exactly where the fire is?

You're Safe with C-TEC

# What if...

You could monitor the building's life safety systems via a Smartphone App to make sure everything is working, being regularly tested, and that faults are being fixed?

You're Safe with C-TEC

# What if...

---

You needed an Evacuation Alert System so the Fire & Rescue Services can manually evacuate the building on a floor-by-floor basis in a fire emergency?

You're Safe with C-TEC

You can with C-TEC
